PROJECT REVIEW

– 2

Date: 20/0/2026

Campus Event Management

SDG:9– SDG Title :Industry, Innovation and Infrastructure

Presented By:

G.SAI MANIKANTA – VTU26808– Reg.No.23UECS0005

Courses Handling Faculty:

Dr. Hafizur Rahman–Assistant Professor

INTRODUCTION

The picture can't be displayed.

1

- **Background of the problem**

Manual Tracking: Notice boards and WhatsApp messages are hard to follow.

Late Updates: Students miss changes in event time or venue.

Paper Records: Managing registrations by hand is slow and causes errors..

2

3

4

- **Why this project is important**

Central Portal: One website for all campus activities.

Live Dashboard: Admins update events instantly for everyone.

Digital Storage: All data is saved safely in a database.

6

- **Real-world relevance**

Colleges: Tech fests, sports, and seminars.

Offices: Meetings and staff training.

Events: Local workshops and community programs.

7

8

9

- **Brief overview of the system**

Design: HTML5 & CSS3.

Backend: Java (Servlets) or PHP.

Database: MySQL (via XAMPP).

PROBLEM STATEMENT

The picture can't be displayed.

1

- Event updates are shared manually through messages

2

- People often miss important event changes

3

- No single platform to create, update and track events

4

- Difficult to notify everyone at the same time

5

- This leads to confusion, delays and miscommunication

6

- Tracking multiple events at once is very hard

7

- There is no automatic alert system for event status changes

8

- Organizations lose time and productivity due to poor event coordination

9

OBJECTIVE(S)

The picture can't be displayed.

1

2

3

4

5

6

7

8

9

- To create a system to manage campus events easily in one place.
- To allow students to register for events online without paperwork.
- To help organizers schedule events and book venues without conflicts.
- To send notifications to students about upcoming events.
- To maintain a record of all events conducted in the campus.
- To provide separate login for admin, organizers, and students.
- To generate reports on event attendance and participation.
- To make event management faster, easier, and error-free.

PROPOSED SYSTEM

The picture can't be displayed.

1

- Users can register and login with their own account

2

- Organizers can create and manage events easily

3

- Students can register for events online

4

- Venues can be booked without conflicts

- Notifications are sent for upcoming events

- Attendance is tracked digitally

- Admin can view reports and statistics

- Students can give feedback after events

TECHNOLOGIES USED

The picture can't be displayed.

- Frontend:

HTML5 — structure of web pages

CSS3 — styling and design

JavaScript — real-time polling and dynamic updates

- Backend:

PHP — handles all server-side logic

Session management — keeps users logged in securely

- Database:

MySQL — stores users, events, notifications and updates

phpMyAdmin — used to manage the database visually

- Tools:

VS Code — code editor

XAMPP — local server to run PHP and MySQL

Eclipse IDE — project management

- Hardware/Software Requirements:

Any computer with minimum 4GB RAM

Internet browser (Chrome, Firefox, Edge)

Windows OS

XAMPP v3.3.0

Any modern web browser

MODULE DESCRIPTION

1

Module 1: User Management

Handles user registration, login and logout with secure session-based authentication.

2

Module 2: Core Processing

Implements real-time event creation, status updates and JavaScript polling every 4 seconds to sync data automatically.

3

4

5

Module 3: Database Management

Manages data storage and retrieval using MySQL with 4 tables — users, events, event_updates and notifications.

6

7

8

Module 4: Reporting & Analytics

Displays live event dashboard with status filters, bell notification count and toast messages for better decision-making.

The screenshot shows a login interface with a white card on a light gray background. The card has a blue header 'Welcome Back' and a subtitle 'Access your campus events and manage registrations.' Below this are two input fields: 'Email Address' and 'Password', each with a placeholder 'Enter your email' and 'Enter your password' respectively. A blue 'Sign In' button is positioned below the password field. At the bottom of the card, it says 'New to the portal? [Create an Account](#)'.

ADVANTAGES & LIMITATIONS

The picture can't be displayed.

1

Advantages:

- Real-time updates without refreshing the page
- Easy to use for anyone — simple and clean interface
- Instant bell notifications when event status changes
- Secure login system protects user data
- All events stored safely in MySQL database
- Works on any device with a web browser

5

6

Limitations:

7

- Works only on local server (XAMPP) — not live on internet
- Requires XAMPP to be running every time
- No mobile app — only works on web browser
- Only one admin role — no different user permissions
- No email notifications — only in-app bell alerts
- Internet connection needed for browser to work
